TECHNOVA

Exit and Resignation Procedure2026

Effective Date: June 15, 2026
Version: 1.0
Approved By: Human Resources Operations and Central IT Security Infrastructure Teams.

1.0 Resignation and Notification Procedures

1.1 Separation Guidelines

A structured, transparent exit procedure ensures operational continuity, smooth task handovers, and a positive long-term relationship between Technova and departing team members. This policy is designed to make the offboarding track simple and clear for both employees and management.

1.2 Submission of Voluntary Resignation

When an employee chooses to leave their role at Technova, the separation workflow formally begins with a written notification.

- **Formal Notice Requirement:** As highlighted in our core guidelines, employees must provide a minimum of two (2) weeks' written notice to their direct manager and the HR Operations team.
- **HRIS Logging:** In addition to notifying the manager, the employee must formally log their resignation date and last working day requests within the self-service HRIS portal to initiate the offboarding track.
- **Notice Period Dynamics:** Elective paid time off (PTO) is generally not permitted during the active notice period to ensure proper handover execution, except in verified medical emergencies.

1.3 Involuntary Separation Protocols

In instances involving business restructuring or performance-based terminations, the separation process is managed directly by departmental leadership in tight coordination with HR. Official notification, final day parameters, and severance logic are delivered in writing, ensuring strict compliance with local labor frameworks.

2.0 Knowledge Transfer and Handover Checkpoints

2.1 Protecting Engineering and Operational Continuity

To prevent project delays, departing team members must comprehensively document and transition their active responsibilities before their final day of active service.

2.2 Constructing the Handover Document

During their final two weeks, the departing employee must compile a clear handover brief within their team's shared documentation space. This brief must cover:

- A complete inventory of active projects, software development tracks, and immediate delivery deadlines.

- Direct status updates on outstanding issues, client requests, and core cross-department dependencies.
- Clear links to relevant code repositories, system technical designs, and engineering runbooks.

2.3 Task Assignment and Peer Synchronization

Managers will review the handover brief and immediately reassign active ownership parameters to remaining team members. Dedicated walkthrough sessions must be scheduled during the final week so the departing employee can sync directly with the peer taking over their daily responsibilities.

3.0 Technical Asset Reclamation and Access Revocation

3.1 Revoking Digital Identity and Infrastructure Access

Securing Technova's proprietary codebases, client environments, and internal networks requires systematic de-provisioning of data access permissions.

3.2 Automated Account Termination

At 5:30 PM on the employee's confirmed final working day, automated IT scripts execute profile deactivation.

- **Corporate Directory Deactivation:** Central IT disables access to corporate email, messaging channels, and internal HRIS dashboards.
- **Engineering Environment Revocation:** Permissions are stripped from secure cloud environments, API consoles, deployment tools, and repository networks.
- **Single Sign-On (SSO) Shutdown:** Core corporate login keys are fully revoked, blocking all inbound connection paths to company tools.

3.3 Return of Company-Issued Hardware

All physical assets belonging to Technova must be returned in good working condition. Local employees must hand over their devices to the office IT helpdesk on their final day, while remote staff will receive a pre-paid shipping container to return their equipment within 48 hours of separation. Returned items include:

- Company-issued laptops, power adapters, and diagnostic testing accessories.
- Corporate mobile phones, secondary authentication keys, and specialized technical hardware components.
- Physical facility security badges, office keys, and parking access passes.

4.0 Final Settlement, Clearances, and Exit Interviews

4.1 Administrative Closure and Financial Settlement

Finalizing your employment history at Technova involves clearing outstanding expense reports and processing your final paycheck smoothly.

4.2 Expense Reports and Final Payout Processing

- **Expense Submissions:** All business travel, client entertainment, or remote workspace expense claims must be logged with valid receipts within the first week of the notice period.
- **PTO Payout Calculations:** Any accrued, unused Paid Time Off (PTO) remaining in the employee's active balance will be calculated and paid out according to local labor regulations.

4.3 The Exit Interview Framework

Technova utilizes exit interviews as an open opportunity to gather candid feedback and continuously improve our internal operations. HR will coordinate a brief conversation during the employee's final two days of active service. This discussion focuses on gathering insights regarding workspace tools, technical infrastructure bottlenecks, team management dynamics, and overall growth opportunities.

5.0 Post-Employment Conduct, Compliance, and FAQs

5.1 Post-Separation Compliance Case Study: Handling IP Data

- **Scenario:** An engineer completing their final week at Technova copies several custom scripts they authored onto a personal thumb drive to use as a personal reference at their next job.
- **Analysis:** This action breaks our security and exit guidelines. All software code, technical briefs, and designs created during your employment belong exclusively to Technova and constitute sensitive proprietary IP.
- **Correct Action:** The engineer must leave all data, code repos, and technical documentation completely within company systems. Extracting data onto personal storage media before an exit is flagged by automated system monitors and can lead to immediate legal review.

5.2 Frequently Asked Questions (FAQs)

Q1: Can I change my mind and rescind my resignation after logging it into the HRIS? A: Retracting a resignation notice is subject to executive leadership and department manager approval, depending on business requirements and whether a replacement has already been hired.

Q2: How do I access my past pay stubs and tax documents after my corporate account is disabled? A: Following account deactivation, an alternate, personal login portal link will be transmitted to your verified personal email address, allowing secure access to past payroll records and tax forms.

Q3: Who do I contact if my pre-paid hardware return container doesn't arrive on time? A: Reach out directly to the Central IT Logistics team via our external corporate helpdesk contact line to re-verify your residential address coordinates and track your shipment.

5.3 Revision History

- **Version:** 1.0
- **Date of Revision:** June 15, 2026
- **Summary of Changes:** Initial implementation of the standardized corporate Exit and Resignation standard operating procedures.
- **Approved By:** Human Resources Operations and Central IT Security Infrastructure Teams.
